

# 511

## Cardio-Respiratory Monitor

Small, portable and exceptionally easy to learn and use, the 511 monitors heart rate, respiration and oxygen saturation, all in one simple device.

The 511 is a cardio-respiratory monitor with a proven history of performance and many desirable features, including:

- Monitors all three key parameters: heart rate, respiration and oxygen saturation
- Includes advanced Nellcor® *OxiMax*® technology
- Appropriate for neonatal, pediatric and adult patients
- Monitors patients in a variety of care settings
- Provides critical information for rapid decision-making
- Long battery life allows for continuous monitoring when AC power is not available
- Works with CAS Express™ software

### Apnea Monitors
