

Access, review and analyze data more quickly and easily than ever.

cas  ***xpress***™

Software for the Ami® Plus and Event-Link® Apnea Monitors

For caregivers involved in apnea monitoring, CAS Express™ software is a dream come true. We created it with your needs in mind. You told us you wanted software that was easy to learn and use, would give you exactly the information you wanted and save you precious time. CAS Express delivers all that and more.

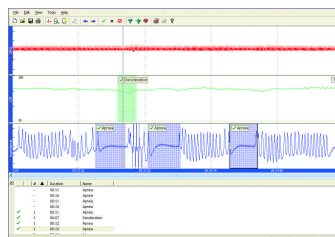

Features include:

- > Fast file creation for immediate waveform review
- > Simple, intuitive operation
- > Clean, easy-to-read reports you can customize to your needs
- > One-click e-mailing of files
- > Automatic carry-forward of patient data from previous downloads
- > Automatic updating of clinical history
- > Comprehensive data file encryption

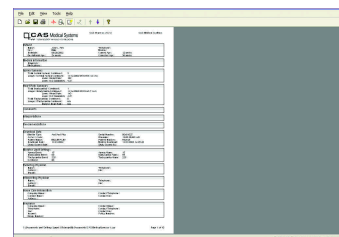

CAS Express™

Software for the Ami® Plus and Event-Link® Apnea Monitors

Whether you work in a hospital or provide homecare, CAS Express™ lets you standardize apnea software for all of your AMI® and Event-Link® monitors on one simple, easy-to-use platform. CAS Express is designed to make downloading and reviewing monitor data as fast and easy as possible.

Screens are clear, concise and logically organized. Events may be added, deleted or modified with minimal keystrokes.

Report sections can be customized to your requirements. You print only the information you need.

You'll appreciate these new features:

- > Automatic carry-forward of patient data saves you valuable time, because you don't have to re-enter non-changing patient information. CAS Express even calculates corrected age automatically.
- > Automatic updating of clinical history lets you quickly review the patient's progress by viewing comments and physician interpretations from previous downloads.
- > CAS Express encrypts each patient data file, for enhanced security and HIPAA compliance.
- > CAS provides free software upgrades for all Ami and Event-Link customers.

Computer Specifications:

PC with Windows 98 or higher.

Note: CAS Express is not compatible with patient files created using Ami Report Generator (RG) or Event-Link for Windows (ELW) software programs.
